Office Action Summary		10/553,230	FOTTINGER, KLAUS			
		Examiner	Art Unit			
		Caixia Lu	1713			
	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)⊠	Responsive to communication(s) filed on <u>02 At</u>	ugust 2007.				
•		action is non-final.				
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
٠,۵	closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Dispositi	on of Claims

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 2-4, 6 and 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Luciani et al. (US 6,028,149) in view of Monte et al. (US 5,064,799).

Luciani's Examples 2-4 demonstrate the preparation processes of the Ziegler catalysts comprising (i) contacting silica with an ethyl acetate solution of MgCl<sub>2</sub>, Ti(OBu)<sub>4</sub> and TiCl<sub>4</sub>; (ii) adding dihexyl magnesium and diisobutylphthalate to the reaction mixture of (i); (iii) introducing chloroform and n-butyl chloride to the reaction mixture of (ii) to obtain a solid catalyst precursor solid; and (iv) contacting the catalyst solid with TiCl<sub>4</sub> and diisobutylphthalate and further contacting the resulted solid product with TiCl<sub>4</sub> to provide a solid catalyst component. It is noted that Luciani general discloses electron donors (Lewis bases) to be selected from esters, amines, etc. (col. 4, lines 49-50). Therefore, it would have obvious to switch the electron donor of diisobutylphthalate with an amine compound in search for a catalyst composition with tailor activity and stereoregularity.

While Luciani does not expressly teach the prepolymerization of the Ziegler catalyst, it is conventional to conduct prepolymerization to provide catalyst with larger

Application/Control Number: 10/553,230

Art Unit: 1713

particle size and improved particle size distribution. Those teachings are disclosed in Monte; see col. 5, lines 58-68.

Thus, it would have been obvious to a skilled artisan at the time the invention was made to Monte's prepolymerization process to Luciani's catalyst preparation process in order to improve the activity and stereo selectivity as well as the particle properties of the catalyst and in the absence of any showing of criticality and unexpected results.

## Response to Arguments

3. Applicant's arguments with respect to the pending claims have been considered but are most in view of the new ground(s) of rejection.

#### Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1713

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caixia Lu whose telephone number is (571) 272-1106. The examiner can normally be reached on 9:00 a.m. to 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
